

## Style 2275 Gas Stop Valve Changer

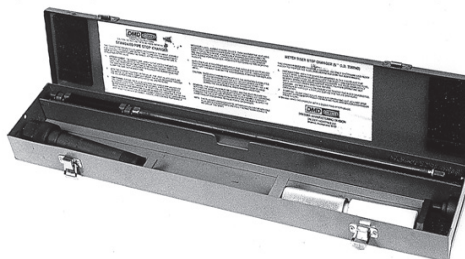

- Available in a multiple of service line sizes
- Easy to operate... No special installation tools required
- In sizes 5/8" through 1-1/4"

Gas utilities have expressed the need for safer, more user-friendly products to facilitate the meter valve change-out procedure. This comes with the use of higher gas pressures and the desire for accelerated methods. In response, Dresser offers the Style 2275 gas stop valve changer that allows for removal of an old valve, re-threading of the service pipe (if necessary), and replacement with a new valve. This procedure is performed safely, under pressure with no escaping gas. The Style 2275 has been utilized by gas utilities time and time again because of its versatility and reliability in accomplishing a valve change-out.

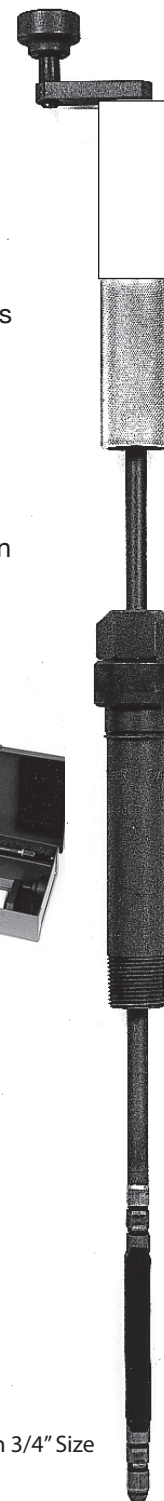

The Dresser valve changer can be used with Dresser valves, as well as most other open port isolation valves in the nominal pipe sizes indicated. There's no need for special tools to use this product, all components are included. The Style 2275 product line is available in sizes 5/8", 3/4", 1" and 1-1/4".

### MINIMUM VALVE PORT OPENINGS

Valve Size	Elongated Port		Round Port Diameter
	Width	Height	
5/8" & 3/4"	7/16"	1/2"	1/2"
1"	17/32"	5/8"	5/8"
1-1/4"	11/16"	13/16"	13/16"
